

LEGEND

C Common - Easily found in small to large numbers in appropriate habitat.

U Uncommon - Occasionally, but not always, found in small numbers with some effort in appropriate habitat.

R Rare - occurs in very small numbers or in a very limited number of sites and may not be found every year or even with concentrated effort. There are more than a few records of these species in appropriate habitats.

A - Accidental - Represents an exceptional occurrence of birds outside their normal range that might not be repeated again for decades.

STATUS

- r** - resident
- b** - confirmed breeder
- s** - summer resident
- w** - winter resident
- m** - migrant - passing through on way to summer or winter grounds, may only be found in narrow periods of time
- v** - visitor; not on normal migration route
- i** - introduced species

Sp - spring: March - May **F** - fall: Sept. - Nov.
Su - summer: June - Aug. **W** - winter: Dec. - Feb.

There are 204 species of birds represented on this list. The area covers the Anchor River drainage, the watersheds draining into Kachemak Bay including all of Kachemak Bay State Park, and the Bay itself. The northern boundary crosses the southern end of the Kenai National Wildlife Refuge; the eastern border coincides with the western boundary of Kenai Fjords National Park and runs in the highlands above the southern drainages to Kachemak Bay down to Point Pogibshi. Some of the species on this list can only be seen on the South side of Kachemak Bay or in other areas off of the road system.

For information on birding contacts, hotspots, field trips, etc. go to the Kachemak Bay Birders website at: www.kachemakbaybirders.org or the Homer birding website at www.birdinghomer.alaska.org.
